

European EMC Products Ltd

MODULAR RF SHIELDED ROOMS

The European EMC Products Limited modular shielded rooms are constructed from prefabricated, standardised panels. The panels are connected using bolts and electrically conductive mesh gasket between each joint. The modular construction allows almost unlimited size and configuration.

Panel material is 2 mm thick galvanised steel sheet for maximum shielding performance and corrosion resistance.

RF Performance (Standard)

Magnetic Field: 60 dB at 10 kHz to 100 dB at 100 kHz

Electric Field: 100 dB from 1kHz to 1GHz

Plane Wave: 100 dB from 1 GHz to 10 GHz

Upper and lower frequency performance can be extended if required

Modular room under construction

Modular shielded rooms can be lined with a variety of materials for an office like interior to microwave absorbers for semi or fully anechoic chambers
